**PROFESSIONAL EXPERIENCE**

**CORPORATE EHS MANAGER** | Company Name, City, ST 2015 to Present

Visionary, sought-after leader who captains global corporate-wide EHS and OSHA compliance programs and processes. Generate global monthly EHS metrics and present to corporate VP of Supply Chain, Operations, EHS, and other senior company leaders. Promoted to deliver company level safety planning programs and policy. Direct Gensuite utilization as the primary EHS management and enterprise resource program.

- Step in to fulfil two key EHS leadership roles in design and delivery of corporate EHS policy and harmonizing safety systems due to significant corporate/business growth in 2016.
- Generate all EHS reports including records noting OSHA injuries; utilize 3E to manage SDS/chemical approvals using Gensuite and implement modules including injury and key reporting functions.
  - Tie in SDS using Gensuite for each location that streamlines procurement, promotes accuracy and reduces supply chain issues for each site.
- Implement the Accountability Index Program that measures leadership participation and drives front line supervisors to engage/track each site events and safety dialog; program generates an email that addresses the index to each score and validation through annual EHS audits.
- Travel onsite to major sites each year to complete annual EHS and OSHA compliance audits.
- Serve as Deputy Emergency Operations Officer and support the “Accept Only Zero” philosophy by engagement personnel in EHS driven programs; support the security team and crisis management program.

**HEALTH & SAFETY ENGINEER** | Company Name, City, ST 2013 to 2015

Continuously promoted to greater EHS leadership roles during tenure. Directed a top-tier team of four Health and Safety Engineers focused on implementation of entire corporate vision, improving operational and process efficiencies. Validated compliance at each audited site.

- Oversaw environmental compliance permitting for Non-Tile V Synthetic Air, Resource Conservation and Recovery Act (RCRA) large/small quantity generator, Toxic Release Inventory (TRI), and State Emergency Response Commission (SERC).
- Extensive knowledge of DOT, OSHA, EPA, Cal-OSHA, Canadian and Australian Regulations, NFPA, MIL-STD-882D, NASA, ISO 14001, OHSAS 18001, ISO9000, and AS9100 standards.
- Energized and motivated personnel to promote a safety-conscious working environment.
- Empowered and mobilized the customer experience with new products and services that improved their efficiencies while retaining the highest level of quality, reliability and performance standards.
- Significantly reduced Total Recordable Injury Rate by 40% and Lost Day Injury Rate by 45% since 2014.
- Successfully upgraded the Indoor Environment Quality (IEQ) program for EPA certified I-BEAM model and reduced IEQ complaints by 80%+.
- Devised and delivered online workforce training including hexavalent chromium, lead, overexertion, and emergency response/contingency planning that reduced annual costs by more than \$150K.
- Created and implemented crisis management plans, policies and procedures for corporate compliance for all EHS and compliance standards.

**PROGRAM QUALITY ENGINEER** | Company Name, City, ST Jun-Sept 2013

Promoted to refine and specify QA/QC standards and procedures for inspecting, testing and evaluating company products precision and accuracy. Identified nonconformance issues and introduced methods that ensured performance and quality products met client, company, and regulatory compliance and standards.

- Served as key liaison between manufacturing, engineering, clients, vendors, and subcontractors ensuring all requirements were met or exceeded.

**MANUFACTURING SAFETY ENGINEER 3** | Company Name, City, ST 2009 to 2013

Oversaw production safety standards in EHS and Mission Assurance Systems safety groups. Generated division polices and stringent training programs for 6K division members. Authored and presented quarterly EHS and sustainability reports to the division president and supported 150+ lab custodians, 58 building landlords, and 100 program managers.

- Acquired and held current two Top Secret clearances that supported numerous programs.

**COORDINATOR MANAGEMENT ANALYST** | Company Name, City, ST 2000 to 2008

Managed the Physical Plant Division, Total Quality Management and customer service initiatives for 900+ personnel. Created strategic goals and division; served as subject matter expert in PPD risk management. Submitted/managed 95 claims to FEMA for 100+ buildings and collection of \$500K+ for 2004 hurricane damages.

- Significantly reduced lost work days by 90%+, modified duty work days by 88%+ and improved on injury, Workers Compensation and property damage rates during tenure.
- Generated and initiated a return to work program in collaboration with HR that saved the university \$300K+ annually and earned a team State of Florida Davis Productivity Award.
